

Oxygen Saves Lives

Is Your Facility Prepared With Emergency Oxygen?

25% of all 911 School Emergencies are related to breathing emergencies.

SURVIVAL RATE

is reduced by approximately

10%

for every minute Oxygen administration is delayed.

Every year over
250,000

children under the age of 15 are admitted to an Emergency Room due to labored or difficult breathing.

Individuals who are experiencing

OPIOID OVERDOSE

should be ventilated with

100% OXYGEN

before Naloxone is administered.

4,000 Americans die each year from Asthma. Many of these deaths are avoidable with proper treatment.

It is **VITAL** to keep Oxygen...

flowing to the brain and organs

while waiting for EMS to arrive on the scene.
